Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach nor fairly suggest a hinge device in the entire claimed combination including a driving motor and a reduction module, a driving shaft, the driving shaft having a flat section with a D-shaped cross section, a driving cam placed on the driving shaft to linearly reciprocate thereon, a driven cam, the driving and driven cams each having a plurality of equally spaced teeth to engage with each other, so that the driven cam will rotate simultaneously with the driving cam; wherein when the driven cam is rotated by an external force, the driving cam moves on the driving shaft in a lengthwise direction, causing the teeth of the driven cam and the driving cam to become disengage, so that the one step hinge device prevents rotating force of a sub-body from being transmitted to the driving part.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
